

xpe::render::sIndexBuffer
::FlushIndex

xpe::render::sIndexBuffer
::FlushIndices

xpe::render::sIndexBuffer
::Resize

```
graph LR; A["xpe::render::sIndexBuffer::FlushIndex"] --> C["xpe::render::sIndexBuffer::Resize"]; B["xpe::render::sIndexBuffer::FlushIndices"] --> C;
```

The diagram illustrates a function mapping. On the left, two white rectangular boxes represent source functions: 'xpe::render::sIndexBuffer::FlushIndex' (top) and 'xpe::render::sIndexBuffer::FlushIndices' (bottom). On the right, a gray rectangular box represents the target function: 'xpe::render::sIndexBuffer::Resize'. Two blue arrows originate from the right side of the source boxes and point towards the left side of the target box, indicating that both source functions are mapped to the target function.
